-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Specification*

The disclosure is objected to because of the following informalities: Applicant has failed to provide Examiner with the respective US Application numbers associated with Attorney Docket numbers on page 1, paragraph [003].

Appropriate correction is required.

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,9 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Cook'081 et al.

The Cook et al. reference discloses a leak detection/diagnostic system for the headspace of a fuel system (see Figure 3) where tank readings are taken a time 1 and time 2 (i.e. a count of two) and the determination/evaluation of the leakage is determined in block 128, wherein the method as claimed would be inherent during the normal use and operation of the device.

In regard to claim 9, see col. 8, lines 43-51.

In regard to claim 10, the evaluation is based on tests taken a two different time intervals (i.e. which is less than 10).

Art Unit: 3751

*Allowable Subject Matter*

Claims 2-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
